

Bony Patel

PHILADELPHIA, PA

Software Engineer with experience modernizing C# ASP.NET and Python applications as well as high performance C++ backend development.

609-705-5864 | Bonyjpatel@gmail.com

Technical Skills

PROGRAMMING LANGUAGES, TECHNICAL TOOLS AND FRAMEWORKS

- C#, C++, Python, Javascript, SQL Server, REST APIs, ASP.NET, .NET Core, MVC, jQuery, Unit Testing, GIT

Experience

CobbleStone Software

Lindenwold, New Jersey

API DEVELOPER II

Aug. 2024 - Present

- Maintain and develop new features for ASP.NET Framework REST APIs enabling clients to perform CRUD operations and execute complex business logic
- Refactoring and migrating existing API endpoints to .NET Core to enhance performance, scalability, and security
- Contributing new functionality to internal libraries for enhanced Permissioning, OAuth 2.0 Authentication, and Database interfacing to streamline implementation in new environments and tools
- Develop Add-Ins for Microsoft Word, Outlook and Teams which used the CobbleStone REST API for backend functionality and Javascript for the frontend
- Serve as the CobbleStone API Subject Matter Expert (SME), providing technical guidance to clients and internal teams through detailed documentation and collaborative peer programming

Bank of New York Mellon

Pittsburgh, Pennsylvania

SENIOR SOFTWARE SPECIALIST

Sep. 2022 - Nov. 2023

- Contributed to the Remittance Processing Team with a focus on transforming two out-dated applications into more modern web-based applications with enhanced capabilities and security
- Redeveloped an ASP.NET Framework application into an ASP.NET Core web application to add several new search and filtering capabilities as well as integration with the Bank's SSO capabilities
- Migrated legacy scripts from Java to Python, significantly improving data security and operational efficiency
- Engineered both tools in a full-stack capacity where I authored the database tables, the authentication functionality, all of the user functionality and the interface

Gnostech Inc.

Mount Laurel, New Jersey

MID SOFTWARE ENGINEER

Jun. 2021 - Sep. 2022

- Worked on the Interoperability team to implement new features and uphold existing code, contributing in the development of the Oasis Simulator used by the US Navy
- Responsible for creating new simulation capabilities for testing Ballistic Missile functionality using C# and ASP.NET Core
- Incorporated new functionality to the Aegis Defense System to allow for testing with the Oasis Simulator and performed the full scale lab testing
- The new added functionality to the simulator and defense system resulted in three ship baseline getting fifteen new test scenarios each
- Mentored a college co-op in software development principles, coding best practices, and project management techniques

Fannie Mae

Reston, Virginia

SENIOR ASSOCIATE

Sep. 2020 - Mar. 2021

- Helped the Cloud Security team re-design and develop an ASP.NET reporting application that compiled important encryption data from multiple different on-prem and cloud resources
- Developed multiple REST APIs using C# lambda functions to automate non-functional requirements to increase the team's ability to monitor and remediate incorrectly configured AWS resources

ASRC Federal Mission Solutions

Moorestown, New Jersey

SOFTWARE ENGINEER, ASSOCIATE

Sep. 2018 - Sep. 2020

- Worked with the Command and Decision team to implement new features and maintain existing C++ code to modernize the Aegis Defense System for by the US Navy
- Rigorously tested and analyzed the structure of a dozen different components by performing tests ranging from unit tests to large scale production tests at a full-scale test facility
- Designed, implemented, and rigorously performance-tested a data validation API for crucial UDP messages resulting in increased system reliability by safeguarding against spam and invalid data inputs

Valeo Inc.

Troy, Michigan

SOFTWARE ENGINEERING CO-OP

Jun. 2017 - Sep. 2017

- Increased software fidelity by developing a Python tool to automatically run stress tests on new software releases, which lead to increased productivity by removing the need for engineers to run tests manually

Education

Rutgers University

New Brunswick, New Jersey

B.S. IN COMPUTER ENGINEERING

Sep. 2014 - May 2018
